

cryo-GO

Vitrification Device

Introducing **cryo-GO**, the newest vitrification device from FUJIFILM Irvine Scientific that raises the standard of excellence for cryopreservation and the storage of valuable specimens.

Unsurpassed quality control through rigorous inspection of every device

- 100% visual inspection
- 100% microscopic inspection
- Additional Artificial Intelligence-assisted inspection

Modern design based on years of industry feedback

- Easy to cap and uncup under LN2 while maintaining a complete seal
- Tapered tip to limit breakage from the body
- Enhanced sample visibility with a streak-free loading area

Bold colors and flexible packaging

- Blue, Green, Purple, Red, and Yellow
- Pack of 10s – individually wrapped
- Pack of 50s – 5 devices per pouch
