Nexpring Health™

Embryo Transfer

Transfer embryos with confidence.

Powered by Nexpring Health

Cook Reproductive Health · Hamilton Thorne · IrvineScientific · Planer · IVFtech · Gynemed · Gynétics · Microptic · Tek Event · Embryotech

Whatever your embryo transfer needs, Nexpring Health can help

Our product portfolio includes straight and pre-curved catheters, mock catheters, obturators, flushing and intratubal catheters.

In addition to offering devices in a range of sizes and configurations, we have unique features and technologies, such as EchoTip® technology.

Look for the EchoTip brand when you need an echogenic tip that displays brightly under ultrasound. EchoTip catheters enhance visualization with dimpled stainless steel bands that reflect ultrasound waves.

Simulation Training

Improve your embryo transfer skills with an ASRM embryo transfer (ET) simulator. Contact your local Nexpring Health representative to ask about training opportunities.

Guardia Embryo Transfer Catheters are designed for ease of access

Guardia™
EMBRYO TRANSFER CATHETERS

EchoTip option available.

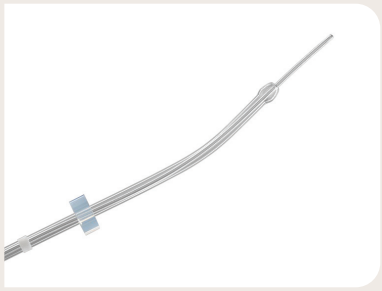

Microvol technology minimizes the volume of media that is required.

The rounded bulb tip helps for passage through the cervix.

The precurved tip approximates the angle of the cervix.

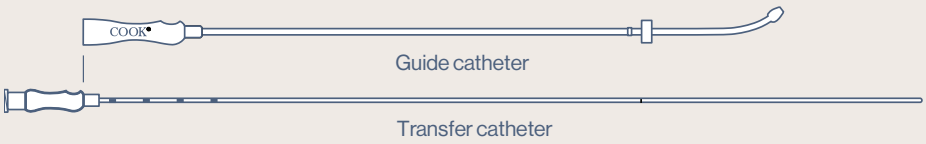

The adjustable cervical stop indicates the catheter's depth in the cervix.

Guardia Access Embryo Transfer Catheter

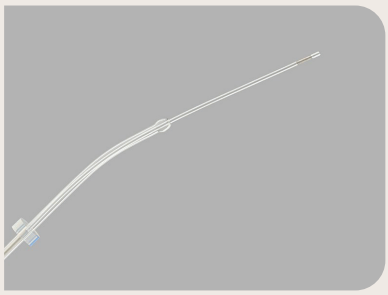

Used to place *in vitro* fertilized (IVF) embryos into the uterine cavity.

- The guide catheter is curved to facilitate insertion.
- The guide catheter's rounded bulb tip eases passage through the cervix.
- The transfer catheter is soft and flexible.
- The Microvol technology minimizes the volume of media that is required.
- The cervical stop is set at 4 cm and can be adjusted to 5 cm.
- The catheters are packaged in separate sterile pouches.
- **RPN:** K-JETS-7019, K-JETS-6019

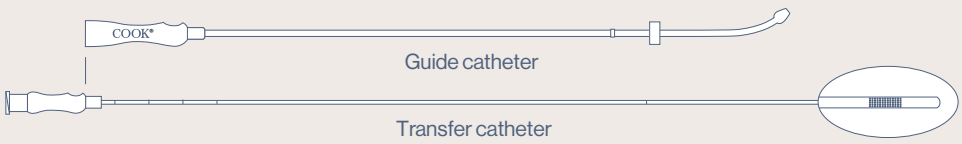

Guardia AccessET Embryo Transfer Catheter

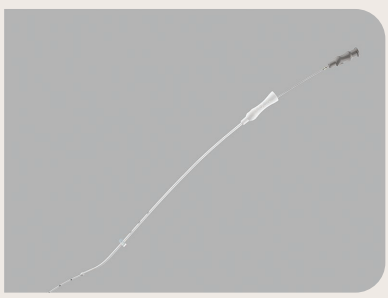

Used to place IVF embryos into the uterine cavity.

- The transfer catheter's echogenic tip improves visibility under ultrasound.
- The guide catheter is curved to facilitate insertion.
- The guide catheter's rounded bulb tip eases passage through the cervix.
- **RPN**: K-JETS-7019-ET, K-JETS-6019-ET

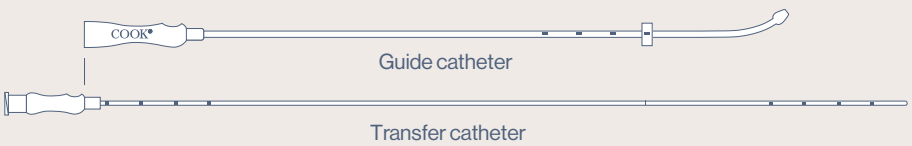

Guardia Access Nano Embryo Transfer Catheter

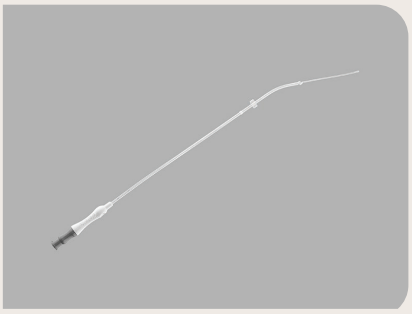

Used to place IVF embryos into the uterine cavity.

- The outer diameter of the guide catheter's bulb tip is reduced for smaller anatomy.
- The transfer catheter has an internal support cannula.
- **RPN**: K-JETS-551910-S

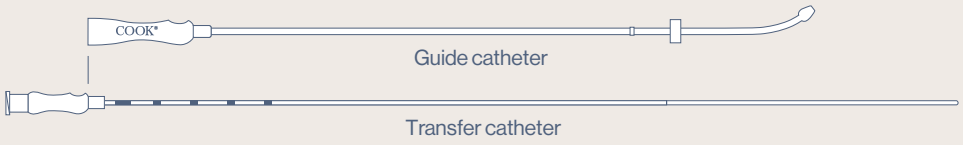

Guardia Access Embryo Transfer Catheter with Internal Support Cannula

Used to place in vitro fertilized IVF embryos into the uterine cavity.

- The integrated support cannula aids in placing the transfer catheter.
- **RPN**: K-JETS-7019-INT

Guardia Obturator

Used to supplement and assist uterine access of a cleared, dimensionally compatible embryo transfer device for placement of IVF embryos into the uterine cavity.

- The adjustable length works with a variety of Cook Medical and other embryo transfer catheters.
- The hub locks in place.
- **RPN**: J-UOB-4028; J-UOB-4028-ST, J-UOB-2828

Guardia Access Malleable Obturator

Used to supplement and assist uterine access of a cleared, dimensionally compatible embryo transfer device for placement of IVF embryos into the uterine cavity.

- It is designed to fit the standard Guardia Access Embryo Transfer Catheter.
- It is malleable for maneuverability.
- **RPN**: K-JET-7002

Soft-Pass embryo transfer catheters are soft and flexible to facilitate placement

Soft-Pass™

EMBRYO TRANSFER CATHETER SET

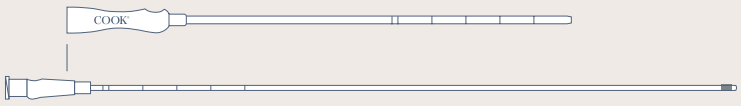

Soft-Pass Embryo Transfer Catheter Set

Used to place IVF embryos into the uterine cavity.

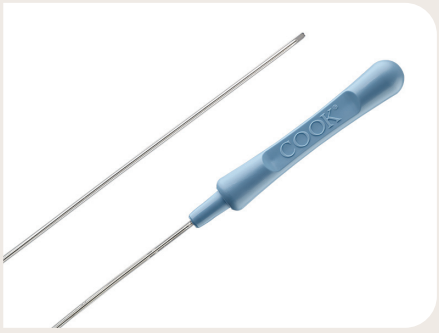

- The soft, flexible guide catheter is designed to facilitate placement of the set.
- Sets are available with transfer catheters that have an integrated stainless steel support cannula to aid catheter placement.

Soft-Pass Malleable Obturator

Used to supplement and assist uterine access of a cleared, dimensionally compatible embryo transfer device for placement of IVF embryos into the uterine cavity.
